PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building scalable applications using Node.js, NestJS, TypeScript, and PostgreSQL. Experienced in microservices, AWS infrastructure, healthcare interoperability (HL7), third-party integrations, and AI-powered backend workflows.

TECHNICAL SKILLS

Frontend: React

Backend: Node.js, NestJS, Express.js, Python

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3, Route 53, CloudFront), GCP, Docker, Kubernetes, CI/CD

Architecture & AI: Microservices, Event-Driven Systems, Asynchronous Processing, Generative AI

PROFESSIONAL EXPERIENCE

DaivTech Solutions **Jan 2025 – Present**

Software Engineer *Coimbatore*

- Designed and developed backend services using **NestJS, TypeScript, PostgreSQL, Redis, and AWS** for healthcare and SaaS applications.
- Implemented **HL7 integration** for standardized exchange of patient and clinical data between healthcare systems.
- Integrated **Gmail API and Microsoft Graph API (Outlook)** using OAuth 2.0 for secure email connectivity and communication workflows.
- Developed a **multi-tenant Investor Relations platform** supporting tenant-specific public pages, subdomain routing, and cloud-based deployments.
- Designed appointment booking workflows with Redis-based temporary reservations and PostgreSQL transactions to prevent concurrent booking conflicts.
- Integrated **Stripe and Razorpay** for payment processing, webhook handling, and transaction lifecycle management.

Iamneo.ai **May 2022 – Jan 2025**

Software Engineer *Coimbatore*

- Developed and maintained backend functionality for an online coding assessment and evaluation platform.
- Debugged and resolved critical code evaluation failures in a containerized assessment platform, improving execution reliability.
- Built **Docker-based isolated coding environments** supporting multiple programming languages and development stacks.
- Developed a Chrome extension for online examination monitoring with real-time activity tracking.
- Deployed and maintained containerized services using Kubernetes and cloud infrastructure.

SELECTED PROJECTS

AI-Powered Marketing Platform

- Built AI marketing backend using NestJS and PostgreSQL for brand-aware social media content generation.
- Designing configurable brand contexts, including tone, audience, content style, and platform-specific generation preferences.

Coder and Colab Platform

- Implemented face liveness detection and facial recognition for authentication.
- Built Docker-based environments supporting multiple development stacks

EDUCATION

Rathinam Global University Apr 2023

M.Sc. Computer Science Coimbatore
