SUMMARY

Backend Engineer with 4+ years of experience building scalable backend systems, AI-enabled platforms, and workflow automation solutions using Node.js, TypeScript, Java, and SQL. Experienced in microservices, cloud infrastructure, distributed systems, and backend optimization using AWS, Docker, and Kubernetes. Passionate about building reliable, automation-first systems with clean architecture and AI-driven workflows.

SKILLS

- **Frontend**: React
- **Backend**: Node.js, NestJS, Express, Java
- **Databases**: PostgreSQL, MySQL, MongoDB
- **Cloud & DevOps**: AWS, GCP, Docker, Kubernetes, CI/CD
- **AI & Architecture**: Workflow Automation, AI Integrations, Distributed Systems

EXPERIENCE

DaivTech Solutions Coimbatore
Software Engineer *Jan 2025 - Present*

- Designed database schemas and improved query performance for a SaaS platform
- Built and maintained 3+ microservices handling high-volume backend operations
- Integrated Stripe and Razorpay for secure payment processing
- Improved CI/CD pipelines and reduced deployment failures

Iamneo.ai Coimbatore
Software Engineer *May 2022 - Jan 2025*

- Fixed critical issues in the evaluation engine and improved system reliability
- Built a Chrome extension for exam monitoring with real-time tracking
- Created Docker-based environments and reduced developer setup time
- Deployed scalable services using Kubernetes and cloud infrastructure

PROJECTS

AI Workflow Automation Platform

- Built an AI-powered workflow automation platform with event-driven task execution
- Developed reusable integrations for webhooks, email, CRM, and third-party services
- Implemented asynchronous job processing and AI-assisted workflow execution
- Designed scalable backend architecture using Node.js, PostgreSQL, Redis, and Docker

Crypto Data Application

- Built an Investor Relations backend using NestJS, TypeScript, Prisma, and PostgreSQL
- Designed microservices-based architecture for domain management and secure portals
- Integrated AWS Route53, EC2, Nginx, and SSM for scalable subdomain publishing and deployment automation
- Designed multi-subdomain architecture supporting scalable Next.js deployments behind Nginx reverse prox

Healthcare Application

- Built a scan booking system with dynamic slot management
- Integrated payment gateways for secure transactions
- Developed audit logging for prescription tracking and error monitoring

Coder and Colab Platform

- Implemented face liveness detection and facial recognition for authentication
- Built Docker-based environments supporting multiple development stacks

EDUCATION

Rathinam College of Arts and Science Coimbatore
M.Sc Computer Science *Apr 2023*
